

SCHOOL SPONSORED PUBLICATIONS

The Board of Education recognizes the importance of good communications between the schools and public. The Board therefore shall publish a periodic newsletter, and shall issue periodic news releases to the print and electronic media, in order to foster the free flow of information to residents of the district and to other interested parties about the districts' programs, activities, and initiatives.

Only such publications and other sources of information as are cited and encouraged here, or that have received the prior authorization of the Superintendent of Schools, shall be deemed to be publications sanctioned by the Board of Education.

The district shall see that all publications of the schools released to the public meet the standards of good journalism. They shall be attractive, factual and readable by the standards of the community.

Publications prepared by a particular school for release to parents/guardians of such school shall be the responsibility of the Building Principal.
